Formation MS Windows Server - PowerShell for Administrators 50025E in Geneva, Zurich, Huston, San-Antonio, Dallas, Los Angeles, San Diego, New York, Washington, Chicago, San Francisco and anywhere in Switzerland, USA, Great Britain and Germany.

ID : 704

Goal : introduce administrators to the new Windows command-line shell. With connectivity to MS products such as MS Exchange Server 2007, MS System Center Operations Manager (MOM 2007), and many more, Windows PowerShell provides a consistent interface to more easily control system administration and accelerate automation. It runs on Windows XP Service Pack 2 (SP2), Windows Server 2003, Windows Vista, and Windows Server 2008

Audience : Intended for IT pros.

Prerequisites : Experience administering servers. This module explains how to name, declare, assign values to, and use variables. It also describes how to store data in an array.

Goals :

- Introduction
- Presentation of MS Windows PowerShell
- The Windows PowerShell Pipeline, Scripts, and Syntax
- Variables and Data Types, Variable Scopes, and Arrays
- Security
- Script Flow Control Statements
- Formatting
- Regular Expressions
- Functions
- Error Handling
- Advanced Scripting for Administrators
- Training Conclusion
