Statistics for MBA, EMBA, CFA and PMP

[(more...)](#)

The aim of this training is to enhance your data analysis and model-building skills, not to transform you into expert management scientists, nor statisticians, by the end of this training. Rather, you should have mastered a set of skills which will enable you to approach a large range of problems in a more structured way. Equally important, you should become informed and critical users of quantitative tools developed for you by others, whether by in-house specialists or external consultants. You should have gained the confidence to look behind their numbers at the underlying assumptions, and challenge these where appropriate.

Trainings, Courses available in Geneva, Zurich, Huston, San-Antonio, Dallas, Los Angeles, San Diego, New York, Washington, Chicago, San Francisco and anywhere in Switzerland, USA, Great Britain and Germany.
