

MS Windows Server training in San-Antonio and anywhere in Switzerland, USA, Great Britain and Germany.

MS SQL Server 2008: Implementing and maintaining Analysis System (6234E)

[\(more...\)](#)

This course teach how to implement an Analysis Services solution in an organization.

MS System Center Configuration Manager 2007: Planning, Deploying, Managing

[\(more...\)](#)

This training will provide you with the knowledge and skills to plan, deploy, and manage MS System Center Configuration Manager 2007 R3. This training focuses on planning and deploying sites and clients, configuring software distribution, deploying operating systems, and managing software updates. It also focuses on remote tools and managing mobile devices.

MS Windows Server 2008: Configuring & Troubleshooting IIS

[\(more...\)](#)

Install, configure, maintain, and troubleshoot an Internet Information Services (IIS) 7.0 Web Server in MS Windows Server 2008.

MS Windows Server 2008: Configuring Active Directory Identity and Access Solutions (6426E)

[\(more...\)](#)

This training provides the knowledge and skills that IT Professionals need to configure identity and access solutions with Windows Server 2008 Active Directory.

MS Windows Server 2008: Configuring an Active Directory Domain Services (6425E)

[\(more...\)](#)

This training provides students with the knowledge and skills to configure Active Directory Domain Services in a distributed environment, implement Group Policies, perform backup and restore, and monitor and troubleshoot Active Directory related issues.

MS Windows Server 2008: Configuring and Troubleshooting a Network Infrastructure (6421E)

[\(more...\)](#)

This training provides students with the knowledge and skills to configure and troubleshoot a Windows Server 2008 network infrastructure. Students will learn to implement and configure secure network access and implement fault tolerant storage technologies. Students will gain an understanding of the network technologies most commonly used with Windows Server 2008 and IP-enabled networks. Students will also learn how to secure servers and maintain update compliance.

MS Windows Server 2008: Configuring and Troubleshooting Terminal Services (6428E)

[\(more...\)](#)

This training provides students with the knowledge and skills to configure, manage, monitor, and troubleshoot a Terminal Services (TS) environment. The course focuses on configuring of TS core functionality, licensing, Gateway, and Web Access.

MS Windows Server 2008: Deploying (6418E)

[\(more...\)](#)

This training provides students with an understanding of migrating and deploying Windows Server 2008, including installation, configuration, and upgrading. Special emphasis is given to upgrading common server configurations and using the Windows Server Deployment Solution Accelerator.

MS Windows Server 2008: Designing a Network Infrastructure

[\(more...\)](#)

Provide students with an understanding of how to design a MS Windows Server 2008 Network Infrastructure that meets business and technical requirements for network services.

MS Windows Server 2008: Designing an Active Directory Infrastructure and Services

[\(more...\)](#)

Design an Active Directory Infrastructure in MS Windows Server 2008 including forests, domain infrastructure, sites and replication, administrative structures, group policies, and Public Key Infrastructures. Attendees will also learn how to design for security, high availability, disaster recovery, and migrations.

MS Windows Server 2008: Designing Applications Infrastructure

[\(more...\)](#)

Students will learn how to design application infrastructure solutions based on MS Windows Server 2008.

MS Windows Server 2008: Managing and Maintaining Network Infrastructure Servers (6431E)

[\(more...\)](#)

The course focuses on creating a plan for managing the server lifecycle, developing and evaluating baselines for monitoring and managing server roles, and analyzing the implementation and configuration of several different server roles for Windows Server 2008. The course will also focus on analyzing and maintaining network server security.

MS Windows Server 2008: Managing and Maintaining Servers (6430)

[\(more...\)](#)

This training provides students with the knowledge and skills to implement, monitor, and maintain MS Windows Server 2008 servers.

MS Windows Server 2008: Tools for Administrators

[\(more...\)](#)

Create a plan for managing the server lifecycle to develop and evaluate baselines for monitoring and managing server roles and analyze the implementation and configuration of several different server roles for Windows Server 2008.

MS Windows Server 2008: Updating your Network and AD Technology skills

[\(more...\)](#)

Provide the students with the knowledge and skills to work with network infrastructure and Active Directory technologies in MS Windows Server 2008.

PowerShell for Administrators 50025E

[\(more...\)](#)

introduce administrators to the new Windows command-line shell. With connectivity to MS products such as MS Exchange Server 2007, MS System Center Operations Manager (MOM 2007), and many more, Windows PowerShell provides a consistent interface to more easily control system administration and accelerate automation. It runs on Windows XP Service Pack 2 (SP2), Windows Server 2003, Windows Vista, and Windows Server 2008

Windows Powershell 2.0

[\(more...\)](#)

This training will introduce IT administrators to the fundamentals of MS Windows PowerShell 2.0 to control and manage a MS Windows Server or a MS Network.

Windows Server 2008: Automating administration with

PowerShell (6434E)

[\(more...\)](#)

This training provides students with the knowledge and skills to utilize Windows PowerShell for administering and automating administration of MS Windows Server 2008. The course focuses on cmdlets, script structure and flow control, language syntax, and implementation details of scripting administrative tasks using COM, WMI, and .NET foundations.

Trainings, Courses available in Geneva, Zurich, Huston, San-Antonio, Dallas, Los Angeles, San Diego, New York, Washington, Chicago, San Francisco and anywhere in Switzerland, USA, Great Britain and Germany.
